MANAGEMENT AND DEMINING WORK IN THE DE-OCCUPIED REGIONS

Due to the large scale of contamination in particular de-occupied areas **SES involves demining units from other regions for working there**. These units work on rotation system.

For coordination and practical organization demining works in the de-occupied regions SES creates **SES Demining Management Groups (SES DMG)** that also functioning on rotation system.

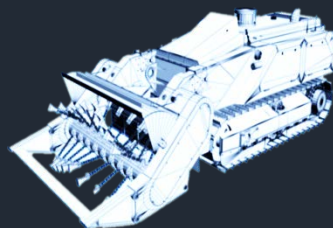

The number of specialists and structure of these Groups depend on the scope and type of the works. General coordination of this **SES Demining Management Groups** is carried out by **Regional Coordination HQ**.

MECHANICAL DEMINING

TOTAL SESU'S FLEET: 94 units

total area cleared by demining machines: over 5 640 ha

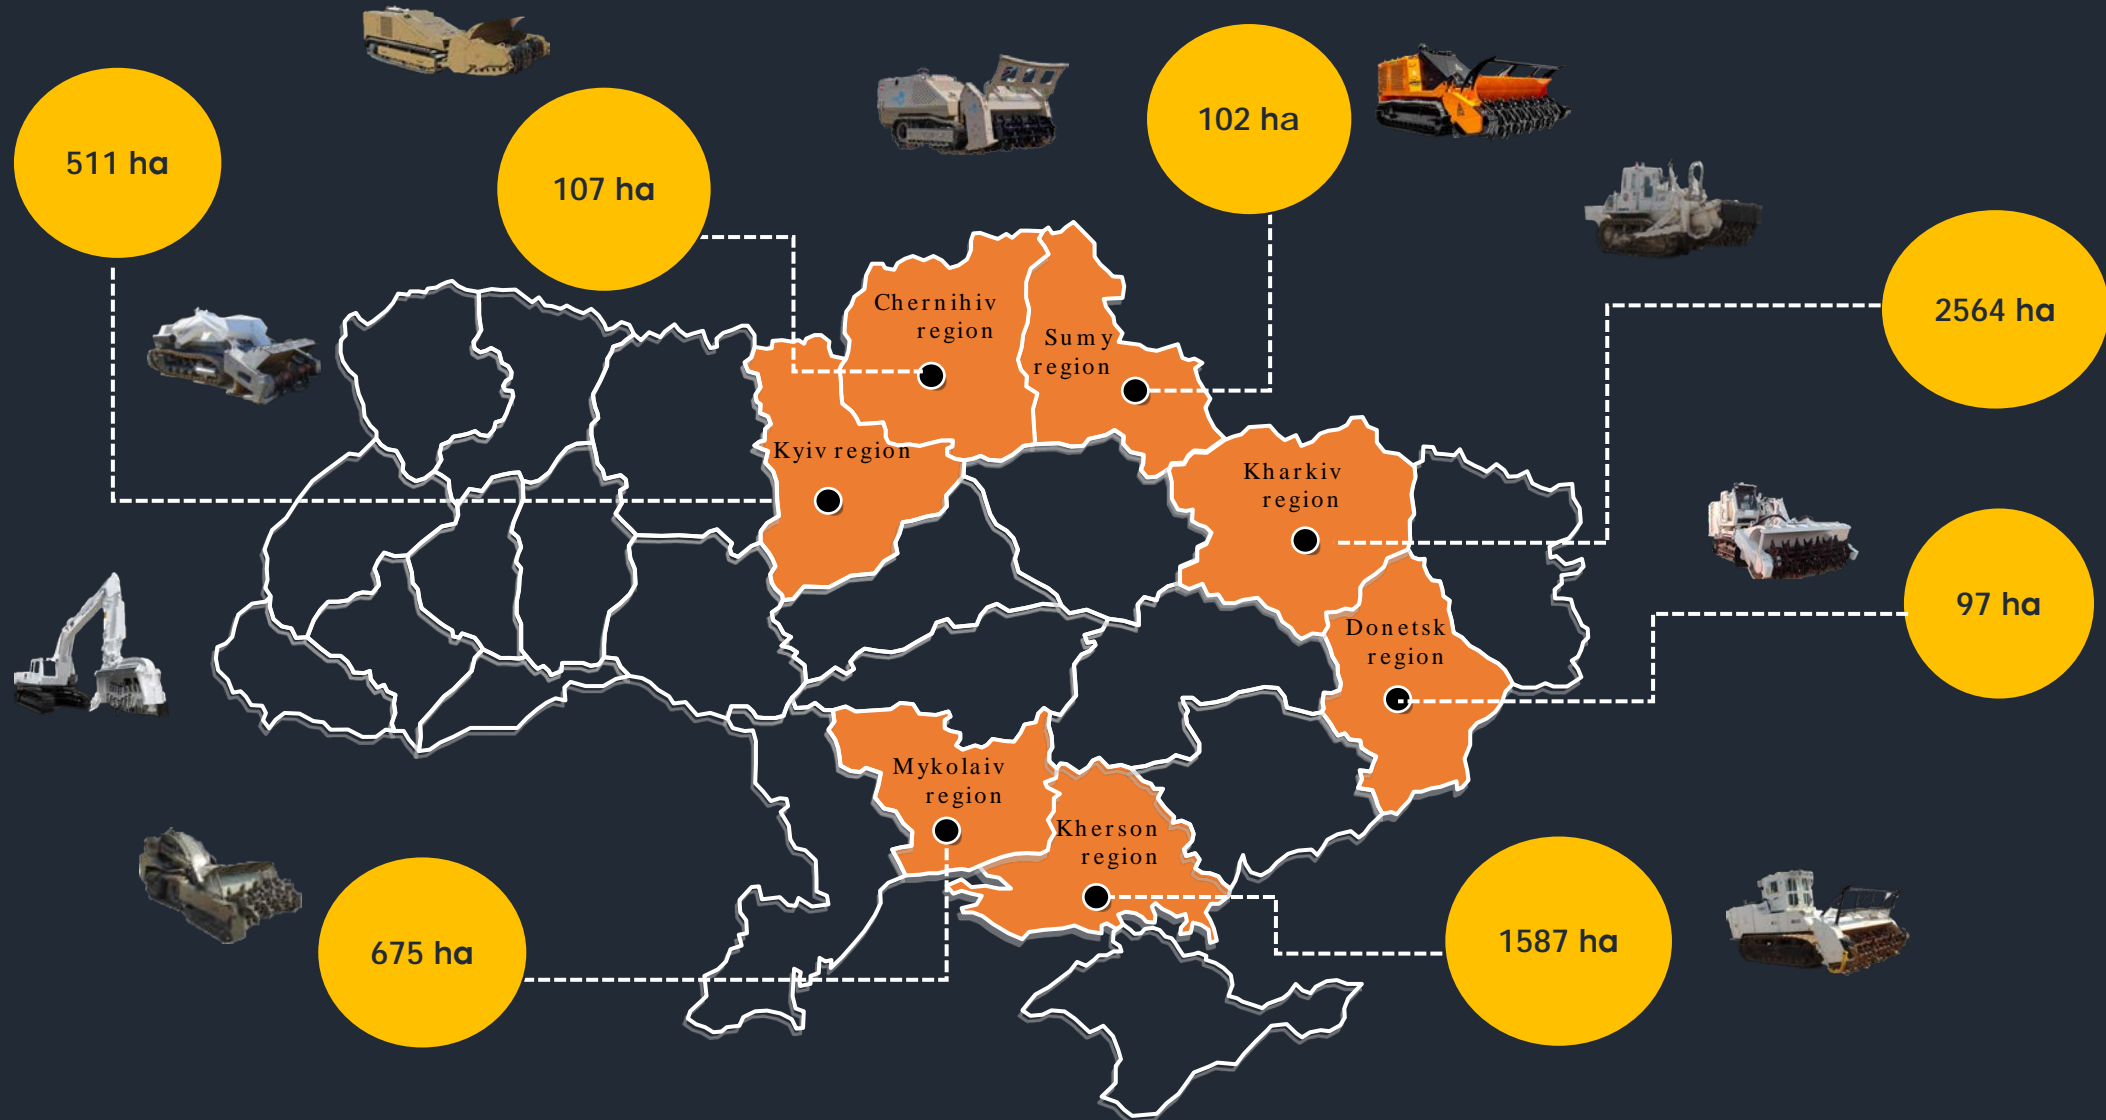

ДСНС
МИКОЛАЇВЩИНИ

number of explosive ordnance detonations: over 11 900

DEPLOYING DEMINING MACHINES IN THE LIBERATED REGIONS

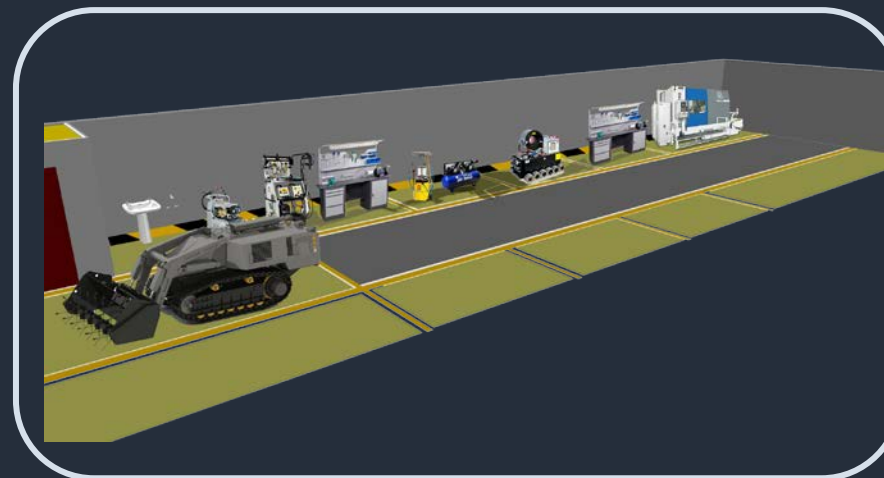

LOGISTICS AND REPAIR HUB FOR MECHANIZED DEMINING VEHICLES

In 2025 repaired :
9 vehicles
7 attached bodies

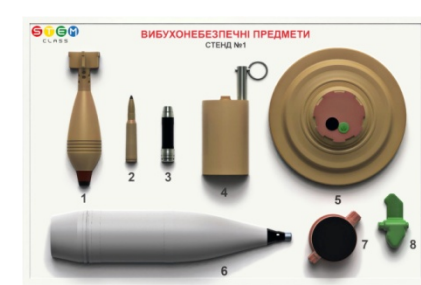

Localization of production of chains with hammers for:
DOK-ING MV-10, REVIVAL-P, GSC-200.

Improvement of the machinery repair and logistics hub by FSD with financial support of Swiss Government

EXPLOSIVE ORDNANCE RISK EDUCATION

Thanks to cooperation with partners, the SES has developed and distributed educational materials, organized information campaigns and conducted EORE. As part of this effort, SES units have carried out over 69 000 activities, reaching more than 2 500 000 people.

Cartoons, games, printed materials and brochures have been created by SESU for local population.

Since 2013, 13 mobile EORE classes have been established.

In total, by mobile EORE classes:
Over 5000 activities have been conducted, reaching more than 300 000 people.

THE MOST DANGEROUS types of mines and cluster munitions that used by the russian federation

Recently, there have been more frequent cases of the enemy using Geran 2 and other UAVs for shelling, with two additional KPTM-3 cassettes attached under their wings, each containing one PTM-3 mine. After falling, it goes to a combat position.

CLUSTER FRAGMENTATION WARHEADS

STRICTLY PROHIBITED:
approaching to this objects closer than 150 m!

THANK YOU FOR YOUR
ATTENTION!

Glory to Ukraine!
