How do clients use Counter-IED UK?

• We work shoulder to shoulder with MOD colleagues to share expertise with clients
• We visit our international partners in joint missions to listen, understand requirements and offer support
• Clients use Counter-IED UK to present options for building Counter-IED capabilities
• Clients present Counter-IED UK with requirements and work with our members to develop the best possible commercial relationship
A model for auditing and building C-IED capability

- In the fullest sense, ‘Capability’ means being prepared in every work stream, to have the ability to do something.
- For Counter IED and Countermine this involves not just the equipment, but also training, personnel, concepts and logistics.
- Counter-IED UK has developed a model for use with describing and controlling the steps

- There are six stages
  1. Immediate action of capturing the requirement
  2. Scoping the need given the clients unique mix of circumstances
  3. Set the conditions for success including a mutually reinforcing set of work streams
  4. Development of the capability in terms of planning for ‘through life’
  5. The clients acquisition process
  6. The integration of the chosen solution into service

In Conclusion

• Counter IED UK can assist government and commercial organisations to develop capability in countering the IED threat

• We achieve this
  • Through the provision of experienced industrial companies and personnel
  • Bolstered by the support and advice of the UK DIT DSO

• Counter-IED UK provides a single contact to suppliers with a wealth of expertise, making a challenging search for capability straightforward.
